Недавно микроблог верфи Цзяннани (Китай) сделал сообщение, что ведется строительство эсминцев усовершенствованной версии Тип 052E, созданных на базе проекта 052D.

В китайском интернете давно муссировались слухи о новой версии эсминца, и они, наконец, получили подтверждение. Отмечается, что корабль имеет удлиненную вертолетную площадку, изменения коснулись и конструкции установок вертикального пуска ракет (*рисунок*).

В настоящее время ведется строительство, по меньшей мере, пяти эсминцев Тип 052E - двух в Цзяннан( Jiangnan) и трех в Даляни(Dalian). Если водоизмещение Тип 052С равно 6000 т, Тип 052D - 6500 т, то в/и новой версии, вероятно, достигло 8000 т, хотя большинство комментаторов останавливается на более разумной цифре 7000 т. Большая полетная палуба, вероятно, предназначена для вертолета Н-20, имеющего большие размеры и взлетную массу 10 т.

Количество построенных и еще находящихся в строительстве эсминцев предыдущей версии 052D составляет 13(14?) единиц, отмечают источники.

## Future factors

In summary, an early 2019 prediction for PLAN ships in service by 2030 are broken down as such:

- 20-24 055/A destroyers (12,000 ton category)
- 40-48 052D/E destroyers (7,000 ton category)
- 48-56 054A/B frigates (4,000-5,600 ton category)
- Approximately 80 SSKs
- Anywhere from 24 or more SSNs (including six to eight existing SSNs)
- Anywhere from 12 or more SSBNs (including four to five existing SSBNs)
- At least four aircraft carriers (two ski jump, two catapult)
- At least 12 071 LPDs (25,000 ton category)
- At least six 075 LHDs (36,000 ton category)

Of the above, frigates, SSNs, SSBNs, and carriers are currently the most difficult to predict, with the most margin for error.
