## **Future factors**

In summary, an early 2019 prediction for PLAN ships in service by 2030 are broken down as such:

- 20-24 055/A destroyers (12,000 ton category)
- 40-48 052D/E destroyers (7,000 ton category)
- 48-56 054A/B frigates (4,000-5,600 ton category)
- Approximately 80 SSKs
- Anywhere from 24 or more SSNs (including six to eight existing SSNs)
- Anywhere from 12 or more SSBNs (including four to six existing SSBNs)
- At least four aircraft carriers (two ski jump, two catapult)
- At least 12 071 LPDs (25,000 ton category)
- At least six 075 LHDs (36,000 ton category)

Of the above, frigates, SSNs, SSBNs, and carriers are currently the most difficult to predict, with the most margin for error.
